

Collins et al., (2015) mouse C57BL/6 cdrh1

A stacked bar chart showing the frequency of 17 different positions (39-55) across 100 trials. The y-axis is labeled 'Frequency' and ranges from 0 to 100. The x-axis is labeled 'Position' and lists positions 39 through 55. Each bar is composed of colored segments representing different categories. The colors used are blue, orange, green, red, purple, cyan, and yellow. The distribution of colors varies significantly across the positions, with some positions being dominated by a single color (e.g., position 41 is almost entirely cyan) and others being highly mixed (e.g., position 40 has segments of blue, orange, green, red, and purple).

Stacked bar chart showing the frequency of different categories (represented by colors) across positions 56 to 65. The y-axis is labeled 'Frequency' and ranges from 0 to 100. The x-axis is labeled 'Position' and ranges from 56 to 65. The bars are stacked with various colors: blue, cyan, green, yellow, orange, red, and grey. Position 60 and 61 are entirely grey.

Position	Blue	Cyan	Green	Yellow	Orange	Red	Grey
56	95	2	1	1	0	0	0
57	5	30	10	5	0	25	0
58	75	10	10	0	0	0	0
59	0	10	25	5	5	20	0
60	0	0	0	0	0	0	100
61	0	0	0	0	0	0	100
62	5	25	30	0	0	25	0
63	75	10	15	0	0	0	0
64	0	20	30	0	0	10	0
65	0	10	75	0	0	0	0
