

A stacked bar chart showing the frequency of 26 positions across 26 categories. The y-axis is labeled 'Frequency' and ranges from 0 to 100. The x-axis is labeled 'Position' and ranges from 1 to 26. Each bar represents a position, and the segments within each bar represent the frequency of different categories (represented by colors) for that position. The colors used are red, cyan, blue, green, purple, orange, and yellow. The distribution is highly varied, with some positions dominated by a single color (e.g., Position 1 is mostly red and green, Position 15 is mostly blue) and others being more mixed.

A stacked bar chart showing the frequency of 17 different categories across 17 positions (39 to 55). The y-axis represents Frequency from 0 to 100. The x-axis represents Position from 39 to 55. The categories are represented by different colors: blue, orange, green, red, purple, cyan, yellow, and brown.
