A stacked bar chart showing the frequency of 17 different positions (39-55) across 100 trials. The y-axis is labeled 'Frequency' and ranges from 0 to 100. The x-axis is labeled 'Position' and lists positions 39 through 55. Each bar is composed of colored segments representing different categories. The colors used are blue, orange, green, red, purple, cyan, and yellow. The distribution of frequencies varies significantly across positions, with some positions (like 40, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55) showing a high frequency of a single color, while others (like 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55) show a more diverse distribution of colors.
